PROFILE

Data and AI governance professional and former Deloitte Business Intelligence Consultant. At Nissan Motors Europe, built the company's first AI governance framework with a colleague (risk classification, human oversight, structured sign-off) and took its first use case, an AI-assisted contract drafting tool for HR and Legal, through a pilot to sign-off from a Director and the SVP Europe. Ran DPIAs and privacy risk assessments in OneTrust, led a 1M+ EUR Customer Data Platform programme across 10+ markets, and read the EU AI Act and GDPR independently. Looking for data governance, AI governance and related programme roles in Budapest or elsewhere in Europe. MSc in Computer Science and Data Science.

WORK EXPERIENCE

Business Analyst & Customer Data Platform Lead Feb 2023 – Sept 2026

Nissan Motors Europe, Budapest, Hungary

- Together with one colleague, built Nissan's first AI governance framework from scratch, including risk classification, human oversight and a structured sign-off process that AI use cases pass through before approval.
- Took the framework's first use case, an AI-assisted contract drafting tool for HR and Legal, through a 2 to 3 month pilot with human oversight and secured sign-off from a Director and the SVP Europe; pushed for its internal adoption before implementation moved to the France team.
- Conducted DPIAs and privacy risk assessments in OneTrust following Nissan's platform migration, with hands-on use of its inventory feature; read the EU AI Act and GDPR independently and am familiar with ISO/IEC 42001 and NIST AI RMF.
- Led a 1M+ EUR Customer Data Platform programme across 10+ markets, scaling two pilots to the G5 and Middle East rollout, and set its strategic vision and roadmap with senior stakeholders; managed and negotiated with vendors selected for project execution.
- Project manager on Arcadia for four Scandinavian markets, an internal project automating the data and visualization pipeline behind reporting; investigated reporting discrepancies to root causes together with regional teams and ran two-week sprints through UAT and release.
- Built Tableau dashboards that cut manual reporting by 30%, managed a Tableau Developer and a Junior Business Analyst, and trained 20+ colleagues in SQL and self-service analytics.

Business Intelligence Consultant Feb 2021 – Feb 2023

Deloitte Consulting, Budapest, Hungary

- Delivered CRM and data transformation engagements for BMW under Deloitte's project governance, and ran client workshops to align requirements with stakeholders.
- Automated reporting pipelines using Tableau Prep and ETL workflows, cutting manual effort by over 70% across client teams.
- Prepared status reports and steering committee materials for senior client stakeholders.
- Applied Salesforce Einstein AI forecasting models on client engagements, and supported Deloitte Canada's COVID-19 vaccine distribution programme with Salesforce CRM.

AI PROJECTS & WRITING

- Independently built and deployed two AI applications with Claude API and Claude Code: a Middle East Conflict Tracker (live data, AI-powered Q&A, multilingual) and a Defense Intelligence Dashboard (160+ sources across 11 domains).
- Write a weekly LinkedIn series on AI and geopolitics, covering Europe's strategic autonomy, the politics of compute, AI risk and kill switches.

CORE SKILLS

- **AI & Data Governance:** AI governance framework design, AI use case risk classification, human oversight and structured sign-off, DPIAs and privacy risk assessments (OneTrust), EU AI Act and GDPR (self-directed reading), ISO/IEC 42001 and NIST AI RMF (familiar with).
- **Programme & Stakeholders:** Programme and project management (Agile and Waterfall), vendor management, steering committee reporting, stakeholder coordination up to Director and SVP level, client workshops, team management.
- **Data & Analytics:** SQL, Tableau, Tableau Prep and ETL automation, data and visualization pipelines, root-cause investigation of reporting discrepancies, Power BI (basic), Microsoft Excel (working proficiency).
- **Tools:** OneTrust, Salesforce CRM, Jira, Confluence, PowerPoint.
